**CRS #K-7351**  
**Webb Property**

**General Description.** The Webb Property is located on the west side of SR 1 in Kent County, Delaware. The former farmstead complex includes a poultry house, equipment shed, storage shed, and paired corn bins; the farmhouse is no longer extant. Generally, the agricultural structures are in fair condition. The associated agricultural land is still in agricultural use.

**Poultry House**

The poultry house (ca. 1925) is rectilinear in shape and is constructed of concrete blocks that were once painted white, but are now almost bare. A small portion of the upper part of the building is constructed of frame and is clad in vertical wood siding that retains remnants of white and red paint. The shed roof of the poultry house features exposed rafter tails and is clad in metal sheathing.

The poultry house faces south; all of the openings are in this elevation and most are covered with wire mesh. At the first story of the façade in the easternmost opening is a vertical board door painted green in color. To the right of the door is a tripartite window opening, which is now missing sash. A singular window opening is located in the final first-story opening. In the frame portion of the façade are three small one-over-one windows. The structure is currently used for storage purposes.

**Outbuildings/Other**

The equipment shed (ca. 1925) is also constructed of concrete block and is covered by a gable roof with a shed roof extension to the rear. The façade (east elevation) of the equipment shed features three pairs of sliding wooden garage doors, a singular sliding wooden garage door, and a pedestrian door. At the north elevation are two four-light metal fixed sash windows. The rear elevation features five open bays to enable easy access by equipment that is currently stored in the structure.

The storage shed (ca. 1925) is a small, short rectilinear frame building clad in horizontal siding. The building rests on concrete block piers. The façade features two open bays. An empty spray canister is stored in one of the bays. The storage shed is in fair to poor condition.

The paired, round wire mesh corn bins (post-1950) have metal roofing and rest on poured concrete slabs. The corn cribs are no longer used for agricultural purposes and a deciduous vine is growing among the walls of the cribs.

**Historical Background.** The property located on the west side of SR 1 near Little Heaven was formed by the combination of two parcels. On September 24, 1919, Emile B. Stevenson and his wife Julia B. Stevenson sold the first parcel containing 5.25 acres to William G. Bowers for \$1,000 (KCDB Q11: 230). On April 18, 1942, Eliza A. Lindale, an administrator for the deceased William G. Bowers, sold the property containing 1.27 acres to Charles N. Webb and his wife Louise D. Webb (KCDB G20: 52).

On January 2, 1930, the Associated Reality Corporation sold the second parcel containing 53.39 acres to Liston H. Webb (KCDB V18: 417). On March 28, 1966, Charles N. and Louise D. Webb conveyed both parcels to Myra H. McIlvaine (KCDB E24: 481). On the same day, Myra H. McIlvaine conveyed the property back to Charles N. Webb (KCDB E24:481).

**Evaluation.** The Webb Property is recommended not eligible for listing in the National Register of Historic Places because it does not meet the eligibility criteria established by the National Park Service (NPS 1997). While the Webb Property retains agricultural buildings common to early- to mid-twentieth-century farmsteads, the farmstead complex lacks its former farmhouse. The loss of the farmhouse has compromised the integrity of setting, feeling, and association of the complex and it is recommended not eligible for listing in the National Register under Criterion A in the area of agriculture.

Property-specific research and documentary research of the area in general did not reveal any associations between the Webb Property and significant events or trends in local, state, or national history. Likewise, research did not reveal any associations with significant individuals; therefore, the property is recommended not eligible for listing under Criterion B. The poultry house, equipment shed, storage shed, and corn bins do not display the distinctive characteristics of a type, style, or method of construction, nor do they represent the work of a master or possess high artistic value; therefore, they are recommended not eligible under Criterion C in the area of architecture. Archaeological investigations have not yet been conducted on this property; therefore, the resource's eligibility under Criterion D (potential to yield information important to history or prehistory) cannot be assessed at this time.
